Medalist of "Semmelweis" Budapest University Dpt. of Dental & OMF

### **The Course Objective**

Participants will learn and train step-by-step the gain of soft tissue for tension free closure, even in cases of reduced soft tissue thickness. By examples of failure, you will learn how to avoid mistakes, and how to build treatment plans based on individual circumstances. You will also get to plan prosthetically and aesthetically the position of the implant on special designed models.

Under the theme « Learn all about Soft Tissue Management », Dr Marius Steigmann will discuss and address the very latest developments and challenges in soft tissue management which are opportune and relevant in daily practice. Recognizing the importance of the soft tissue management in dental implantology, the program will be focusing on the element for a successful implantation.
